Forecast for Friday 29 Nov 2024

Weather: A mostly dry day. Bright spells across the northern Fells, but persistent low cloud across the southern Fells, perhaps thick enough to give some patchy light drizzle at times. Heavy rain moves east across the Lake District early evening, clearing to leave low cloud and drizzle late evening. Mild temperatures, but feeling cold in strong winds across the tops.

Chance of cloud-free hill tops above 800m: 10% in the south, 60% in the north

Low cloud and visibility: Mostly very poor visibility in persistent low cloud across the southern Fells, cloud bases around 400m. Visibility often very good across the northern Fells with patchy cloud above 500m, but the higher felltops often above the cloud.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Milder than recent days, but strong winds will still give a notable chill on the felltops.

Forecast for Saturday 30 Nov 2024

Weather: Persistent low cloud with mainly light rain or drizzle throughout. Heavier rain late evening.

Maximum wind: South-Southwest 40 mph gusting 45-50 mph, becoming South 60 gusting 80 mph late evening.

Chance of cloud-free hill tops above 800m: Nil.

Low cloud and visibility: Very poor visibility with persistent cloud down to 300-400m, often down to the glens.

Temperature: **Valleys:** Plus 10 or 11 Celsius.
At 800m: Plus 7 or 8 Celsius.
Freezing level: Above the summits.
